

NIRAJKUMAR SATANI

Frontend Developer (Angular)

Ahmedabad, Gujarat

 sataniniraj0000@gmail.com |  +91 8155012096

 GitHub: github.com/nirajithubrit | LinkedIn: linkedin.com/in/nirajkumar-satani-803a82204/

SUMMARY

Frontend Developer with **2.9+ years of experience** specializing in **Angular, TypeScript, and RxJS**. Proven expertise in building **scalable, high-performance web and desktop applications** for healthcare and enterprise domains. Strong in reusable component design, performance optimization, and API integration.

PROFESSIONAL EXPERIENCE

Associate Frontend Developer

Wellnest Tech, Ahmedabad | Aug 2023 – Dec 2025

- Developed and optimized **Angular-based web & desktop applications** for healthcare and enterprise use, supporting **1,000+ active users**.
- Built **Sales Portal from scratch**, enabling organization, doctor, and device management, reducing **manual reporting by 22%**.
- Designed **reusable Angular components** and subscription-tracking modules, reducing **customer support queries by 12%**.
- Improved application performance by **up to 90%** using **lazy loading, debounced search, caching, and optimized RxJS flows**.
- Implemented **ECG reporting workflows**, real-time patient search, and advanced filtering for faster clinical operations.
- Integrated **Electron.js** to convert web apps into desktop applications with **USB ECG device connectivity**.
- Developed AI-assisted ECG feature ("InAppSmartness") detecting **6 ECG graph patterns** for clinical insights.
- Built dashboards using **Google Maps & Chart.js** to visualize patient flow and emergency (STEMI) data.
- Created a **reusable PDF generation utility** using **pdfmake**, standardizing ECG report exports across platforms.

Tech Stack: Angular, TypeScript, RxJS, HTML, CSS, Bootstrap, Angular Material, REST APIs, Electron.js

EDUCATION

B.E. – Information Technology

L J Institute of Engineering & Technology, GTU
2019 – 2023 | **CGPA: 8.00**

LANGUAGES

English, Hindi, Gujarati (native)

TECHNICAL SKILLS

Frontend: Angular (v6+), TypeScript, JavaScript (ES6), HTML5, CSS3 (SCSS), Bootstrap, Angular Material, RxJS, NgRx (Basics)

Backend & DB: REST APIs, GraphQL, PostgreSQL, MySQL, MongoDB

Tools: Git, GitHub, Jira, Postman, Jenkins (CI/CD), Webpack

Concepts: Performance Optimization, Lazy Loading, Caching, SEO, State Management, Agile/Scrum

PROJECTS

Jay Harsiddhi Estimate & Invoice App

(Angular | Node.js | MongoDB | Capacitor)

- Developed a full-stack **Estimate & Invoice Management System** to manage customers, products, and estimate records.
- Built responsive UI using **Angular & TypeScript** and implemented REST APIs using **Node.js & Express.js** with **MongoDB**.
- Integrated **pdfMake** to auto-generate dynamic invoice and estimate PDFs.
- Converted web app into **Android mobile application using Capacitor** for real-time estimate creation and sharing.

Tech Stack: Angular, TypeScript, Node.js, Express.js, MongoDB, pdfMake, Capacitor, REST APIs

E-Commerce Web App

- Built using Angular, Node.js, Express.js, MongoDB with authentication and product management.

CERTIFICATIONS & AWARDS

- Wellnest Performer Award – Q4 (Feb 2025), Q3 (Dec 2023)
- Udemy Certified Angular Professional (March 2023)
